Hedging

Please note that if you require larger quantities of any of the product lines most are available to order. Items marked rb (root ball) or br (bare root) are available from stock in approx. mid- October, once temperatures fall to allow for lifting these items from the field, to early spring. Some hedging such as laurel (prunus laurocerasus) develop a better structure by growing in the field rather than pots. Provided they are planted correctly on receipt they will quickly establish and grow away in the spring.

Description	Common Name	Quantity On Order	Price

Viburnum tinus c10		35	29.99

The number which appears after the Latin name is an indication of size of plant. All sizes are approx and should be clarified before purchase if critical.

Plants listed as 10ltr or 15ltr refers to the pot size that they are grown in, these generally are smaller plants. All the other plants have a height measurement which is the minimum height of the plant from the top of the pot to the top of the plant, most would be taller than this, usually up to 25cm.

Availability of hedging stock should only be treated as a guide, as it varies dramatically at this time of year due to the quantity being sold, however most is readily available so please ask.
